Re: Upper Columbia River Site Remedial Investigation and Feasibility Study

Dear Mr. Adzic:

This is written in response to your request for documents regarding the Northport Smelter site, the Bonanza Mill site, the St. Crispin Mine site, and the mercury field survey conducted by EPA at the upper Columbia River. As per our previous conversation, the following documents are enclosed:

Ecology and Environment, Inc., April 2005, *Le Roi Smelter Removal Action*, submitted to EPA, Seattle, Washington.

Herrera Environmental Consultants, January 2003, *Bonanza Mill Removal Action Report*, submitted to EPA, Seattle, Washington.

Ecology and Environment, Inc., July 2005, *Upper Columbia Mercury Field Survey and Removal Assessment Trip Report*, submitted to EPA, Seattle, Washington,

Lockheed Martin Technology Services-Environmental Services REAC, November 2005, *Upper Columbia mercury field survey-Technical Memorandum*, submitted to EPA/Environmental Response Team, Edison, New Jersey.

Information pertinent to the St. Crispin Mine site is contained in the report prepared by Ecology and Environment, Inc., *Preliminary Assessments and Site Investigation Report, Upper Columbia River Mines and Mills, Stevens County, Washington*, October 2002, submitted to EPA, Seattle, Washington. A copy of this report is not enclosed per our previous discussion.

Sincerely,

Monica Tonel
